

Quintus D.F van Tonder - Ivoclar Vivadent Lecturer

Dr van Tonder qualified at the University of Stellenbosch, Cape Province, South Africa in 2000 with a BChD degree. After completion of his studies, he worked for a year in a state clinic in the Mosselbay region in South Africa. During this time, he treated thousands of underprivileged patients in need of care. In 2001 he moved to the UK.

In 2011 he completed a diploma in Aesthetic Dentistry taking a keen interest in cosmetic and aesthetic dentistry. He loves technology and is constantly looking to implement the latest innovations in the practice that will benefit our customers. One of these is the CEREC System.

Since investing in the system, he has completed a tremendous amount of training and has built up a wealth of experience in working with this system to create beautiful smiles and restore patients' dentition, not only functionally, but also aesthetically. Currently, he is working on a project to develop 3D printing for use in the practice and by patients. With this project he aims to create a digital workflow for printing intra oral appliances.

He has also been a Foundation Dentist Trainer passing on his knowledge by giving lectures to dentists in cosmetic fillings and aesthetic dentistry.
